Other:	JIRA, Git, ClearCase, Adobe Target (A/B testing), ExactTarget, Gemini & Rally, Remedy, Zoho CRM, Google Docs, WCAG 2.1

EXPERIENCE

Senior Email Specialist, CIBC, Toronto (Nov 2016-Oct 2026)

- Developed responsive, production-ready, and highly dynamic **HTML Email Templates**, ranging from simple to complex designs, to support critical and time-sensitive projects/campaigns across multiple Lines of Business (LOBs), including Asset Management, Private Wealth, Wood Gundy, Imperial Service, ETFs and Institutional.
- Developed and deployed high-impact email initiatives in **Salesforce Marketing Cloud**, leveraging responsive design and AMPscript-driven personalization to deliver targeted, engaging experiences to a large customer base and directly support revenue growth.
- Advisors communication– Initiated and deployed emails using **Seismic Email blast** feature to support advisors to better manage communication/sales materials.
- Performed **A/B testing** on subject lines, email content, CTAs, layouts, and send times to improve campaign performance.
- Ensured emails were mobile-responsive, visually consistent, aligned with brand guidelines, and compliant **with AODA accessibility standards** (WCAG 2.1).
- Provided ongoing **guidance and training** to users, enabling them to independently update editable OFT email templates while improving workflow efficiency and email deployment best practices.
- Administered **JIRA**, including user workflow configuration, user on-boarding, training, workshop, reporting (using JQL query), and ongoing management of multiple boards supporting email, creative, communications, and video production teams. JIRA improved visibility and productivity of the bigger team significantly.

- Designed and implemented customized **Microsoft Lists** solution with submission forms and Calendar, List, and Kanban views, enabling teams without JIRA access to submit, track and manage ad hoc projects.
- As part of core “Brand Ambassadors” team, supported the core **CIBC rebranding project** by coordinating brand review and approval sessions for multiple Wealth email & web initiatives, ensuring alignment with updated brand standards.
- Ensured all external email communications and templates met **Canada’s Anti-Spam Legislation** (CASL) requirements.

Intermediate Front End Web Developer, BMO Financial Group, Toronto (Dec 2010-Aug 2016)

- Email Marketing – Created and deployed many critical emails campaign using Exact Target including dynamic distributed email sent which were fully responsive to millions of customers which directly impacted on revenue.
- Created and/or implemented various web solutions for a wide variety of BMO Bank of Montreal projects using WEM (CMS), Vignette (CMS), HTML5, CSS3, JavaScript, XML and ASP.NET.
- F15 Redesign - As part of the F15 team implemented full responsive web pages for all BMO assets.
- Test & Target - Worked on Adobe Target projects to track personalized experience based on the customer’s journey in the public site including A/B testing.
- Actively participated on agile rituals such as stand-ups, sprint planning, backlog grooming and retrospectives.
- Adhered to all coding standards, digital style guide/web Accessibility standards/guidelines in day-to-day work on bmo.com websites.

Technical Lead, Gram Precision Scales Inc., Mississauga (Feb 2009-Aug 2010)

- As an offshore team lead, with solid understanding of web usability and interface design standards, implemented multiple Ecommerce websites including web content management system starting from concept to deployment (full SDLC) using front-end languages PHP, JavaScript, VB Script, HTML & CSS and backend database MySQL.
- Served as point of escalation and coordination for resolving various operating challenges.
- Designed and developed websites layout using adobe Photoshop, Illustrator, Dreamweaver application, HTML, CSS, JavaScript, XHTML.
- Search Engine Optimization (SEO) knowledge, research, recommendation, installation and directory submission.
- Monitored project timelines, deliverables, risks and internal budgets.

Programmer Analyst, Citibank Canada, Toronto (Jun 2006-Sep 2008)

[The Confirmation Management System (CMS) is a back office application which generates “Confirmation” - legal contract for each trade, matches Counterparty terms, and support trade lifecycle events for Derivative and cash products. Confirmations are delivered through different media types such as Fax, email, electronic delivery to clearing house like DTCC and SWIFT Accord. The product coverage includes Fixed Income, Equity, Credit Derivatives, FX Options and Treasury (Loans, Deposits, FX). Confirmation Management System applications used by Capital Market Banking Operations in 25+ countries NY, London, Europe & Middle East Asia, Asia Pacific and Latin America.]

- Implemented business logic using SQL and Sybase stored procedures and proactively making sure that none of the existing logic is affected.
- Changing highly sensitive legal definitions on the confirmations based on the business logic and trade economics using XSL's and XSLT's.
- Automated Unix scripts and Autosys jobs for uploading trade data and bulk generation of confirmations for different products.
- Scheduled changes in different environments (3 weeks development cycle) includes: DEV, UAT and PROD environment.
- Proactively performed integration testing work as necessary to ensure that new functionality or enhancements do not adversely affect existing functionality globally.

- Actively involved in everyday application support and addressing global user queries and issues.
- Coordinated for change control which involved interaction with the Clearcase group, DBA group, Server group and Autosys group for UAT and production implementations.
